-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 6) ☐ Other: ____.

Applicant has disclosed highly pertinent prior art in Figures 4 and 5 of the application drawings. With regard to Figure 4, applicant states in the specification that it depicts JP-A-H8-48128. The Examiner's copy of this JP '128 reference however shows significant differences that are highly relevant to the claims, between the schematic diagram in Figure 4 and the actual device. While no publication corresponding to prior art Figure 5 has been produced by applicant, it is evident from page 2, lines 4-9 of applicant's specification that applicant is apparently aware of details of this prior art beyond what is schematically depicted in Figure 5. A publication or carefully drawn sketch of the details of the actual prior art corresponding to prior art Figure 5 is required in response to this action.

This application contains claims directed to the following patentably distinct species of the claimed invention:

First species of device as shown in Figure 1 (wherein the recess houses a servo-motor),

Second species of device, not shown, wherein the recess houses refrigerant piping and

Third species of device, also not shown, wherein the recess houses hot water piping.

In addition applicant must elect one of the following sub-species:

First sub-species of partition board as shown in Figure 1, wherein the partition board is off-set twice (i.e. recessed) to return to its original plane and

Second sub-species of partition board as shown in Figure 3, wherein the partition board is "stepped shaped"

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP§809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3753

To properly elect applicant must elect one species of device from the three listed and one sub-species of partition board from the two listed.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to John K. Ford at telephone number 571-272-4911.
